Portfolio

Hey 👋, Sebastien here.

I am a passionate full-stack web developer with a diverse background. I transitioned from a successful career in sales and logistics to follow my passion for technology. I'm proficient in various languages and frameworks, including but not limited to HTML, CSS, JavaScript, PHP, React, and Vue.

I am a quick learner who can put new technologies to use in a short time. I am currently learning Ansible and Kubernetes. I am also an active contributor to open-source projects. I'm a dedicated professional, seeking remote or Sweden-based opportunities. When not coding, I enjoy being a father, practicing yoga, and gaming.

My continuous learning mindset, combined with my technical skills and enthusiasm for web development, make me a strong candidate for any development team.
